Draw circles using circular objects.

Place a bangle or a coin on a paper. Trace its boundary. The picture you get is a circle.

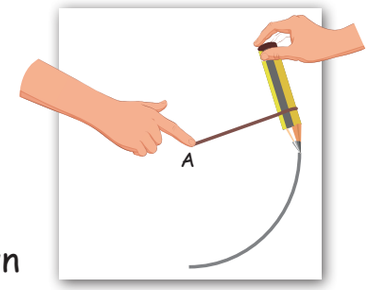

Activity

Let us draw the circle using a pencil and thread.

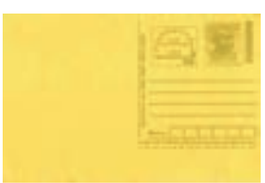

1. Mark a point A on a sheet.
2. Fix the thread at the point A and tie the pencil on the other end of the thread as shown in the figure.
3. Move the pencil by keeping the thread at A. Point A is called the center of the circle.

1.1.1 Draw 2D shapes in free hand with geometry tools

EXAMPLES

Square

Rhombus

Rectangle

Trapezium

Parallelogram
