Parallelogram

A Parallelogram has four sides (EF, FG, GH, HE) and four vertices (E,F, G, H). Opposite sides are parallel and equal in length (EF=GH; FG=HE)

Activity

Form different shapes using Geoboard and discuss the similarities and differences among the shapes.

Exercise 1.2

A. Fill in the blanks.

i. All closed four sided figures are called _____.

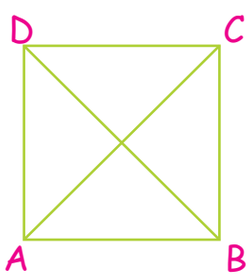

ii. A _____ has four equal sides and equal diagonals.

iii. The opposite sides of a _____ are equal.

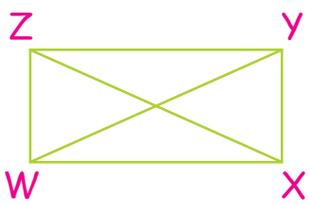

iv. A _____ has no sides.

v. Diagonals are equal in _____ and _____.

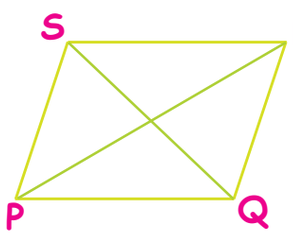

B. Write the name of the sides and diagonals.
