3. Circle the correct subtraction fact (by using casting out nine).

a) 7420 – 3625 = 3795

b) 2362 – 632 = 1720

c) 6732 – 4361 = 2371

d) 3264 – 1063 = 2200

3.2.2 To check any multiplication problem using the method of casting out nine.

EXAMPLE

Multiplicand		Multiplier		Product
3 ~~2~~ ~~7~~	X	4 2	=	1 3 7 3 4
3		4 + 2	=	1 + 3 + 7 + 3 + 4
3	X	6	=	18
		18	=	18
		1 + 8	=	1 + 8
		9	=	9

Note:
Cross out the 9 and components of 9.

In division problem, we can check the quotient by method of costing out nine.

(Remember that division is the reverse of multiplication).

Dividend = Divisor × Quotient + Remainder

EXAMPLE

525	÷	15	=	35
↓↓		↓↓		↓↓
5 + 2 + 5		1 + 5	=	3 + 5
12	÷	6	=	8
		12	=	8 × 6
		12	=	48
		12	=	12
		1 + 2	=	1 + 2
		3	=	3

Note:
If the problem has remainder, we will subtract it from the Dividend.
