EXAMPLE 2

1st picture's fraction = $\frac{2}{5}$

2nd picture's fraction = $\frac{3}{5}$

Here the shaded portion of the 2nd picture is high,
so the 2nd picture is greater than the first.

In other words we can say picture 1 is smaller than picture 2

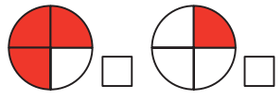

$\frac{2}{5} < \frac{3}{5}$ ($\frac{2}{5}$ is smaller than 3/5)

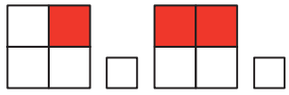

Exercise 6.6

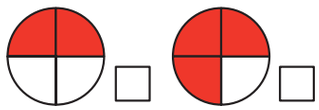

I. Circle the greater fractions

1. $\frac{1}{3}, \frac{2}{3}$ 2. $\frac{3}{4}, \frac{1}{4}$ 3. $\frac{2}{5}, \frac{4}{5}$ 4. $\frac{6}{8}, \frac{3}{8}$ 5. $\frac{4}{10}, \frac{3}{10}$ 6. $\frac{2}{9}, \frac{7}{9}$

II. Tick the smaller fractions

1. 

2. 

3.
