

2.1 Division: (up to 4 digit number by single digit number)

2.1.1 To divide a given number by another number in various ways.

There are many ways to divide a given number by another number. They are

(i) Equal sharing
(ii) Equal grouping
(iii) Repeated subtraction
(iv) Long division
(v) Short division

You have learnt already the type of divisions in previous class. Now we are going to see Equal sharing and short division.

(i) Equal sharing

Priya wants to celebrate her birthday along with her Parents Raghu and Usha. Her father bought a cake for her. She makes the cake into 18 pieces and wants to divide it equally along with her parents, each of them got 6 pieces. At that time her friends Leela, Kala and Mala has come with their gifts. So, she wants to share the cake with her friends also, each of them got 3 pieces. After a few minutes three of her father and mother's friends Mary, Rahim and Ravi has come for

Note

In division, equal sharing leaves remainder also.
