Division with remainder:

EXAMPLE 3

Divide 369 by 7.

```
      52
   ------
7 | 369
    35
   ----
     19
     14
   ----
      5
   ----
```

Step 1: Take 3 in the dividend, 3cannot be divided by 7. Hence to combine the next digit in the dividend (369) in the right. We have to put zero above the division line. So take 36. Divide 36 by 7.

7 divides 6, 5 times (ie) 7 x 5 = 35

Quotient = 5 and Remainder = 1

Step:2

Take 19 ones. Divide 19 by7.

7 divides 19, 2 times (ie) 7 x 2 = 14

Quotient = 2, Remainder = 5.

Quotient = 52 **Remainder = 5**

Exercise 2.1

Simplify the following

1) 896 ÷ 5 **2)** 696 ÷ 6

3) 686 ÷ 7 **4)** 813 ÷ 8

5) 891 ÷ 8 **6)** 703 ÷ 2

7) Rahul has 192 toy cars. He put them equally in 6 boxes. How many toy cars will he put in each box? How many toy cars are left over?

8) Akila has 495 photographs to put in an album. She can put 9 photographs on each page. How many pages can she fill?
