Exercise 1.2

1. Fill in the blanks.

i. All the radii of a circle are _____.

ii. The _____ is the longest chord of a circle.

iii. The distance between the center and any point on the circle to its center is called the _____ of the circle.

iv. A line segment joining any two points on the circle is called a _____.

v. _____ is two times the radius.

vi. A _____ has no sides.

2. Find the diameter of the circle with the given radius.

i. Radius = 10cm ii. Radius = 8cm iii. Radius = 6cm

3. Find the radius of the circle with the given diameter.

i. Diameter = 14cm ii. Diameter =20cm iii. Diameter = 6cm

1.1.3 Drawing a circle using compass

A compass is a geometrical instrument which has two arms, one is a needle and the other one is a pencil holder.

Example

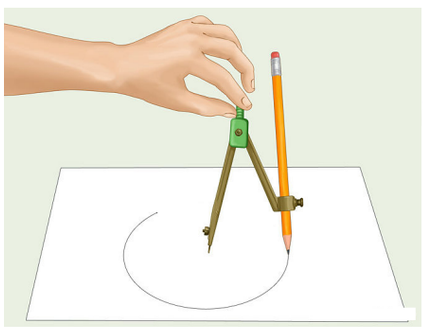

Draw a circle of radius 5cm using a compass.

Step 1 Take a compass and fix the pencil in it.

Step 2 Set the distance between two arms of the compass as 5cm using a scale.

Step 3 Fix firmly the needle of the compass on a point which is marked on the paper.

Step 4 Move the pencil around it in any direction till you reach the starting point.

Exercise 1.3

Draw circles for the following measurements.

i. 6 cm ii. 4cm iii. 8cm iv. 7cm v. 5cm
