## 2.2.2 Arranging numbers in ascending and descending order.

**Ascending order**

Ascending order is arranging numbers from smallest to biggest.

**Example**

4278 4875 4923 4717

Since the digits at the thousandth place are same in all the numbers, we compare the digits at the hundredth place.

Thus, the numbers in **ascending order** is,

$4278 < 4717 < 4875 < 4923$.

4278, 4717, 4875, 4923.

**Descending order**

Descending order means arranging numbers from biggest to smallest.

**Example**

5234, 6271, 4234, 3172, 7871

Thus, the number in descending order is,

$7871 > 6271 > 5234 > 4234 > 3172$

7871, 6271, 5234, 4234, 3172.

**Do You Know?**

The reverse of ascending order is descending order.

## Exercise 2.5

1. Write the following numbers in ascending order.
   i. 7631, 9987, 7634, 5436, 8918
   ii. 4096, 3096, 3099, 2473, 3172
   iii. 5201, 5627, 4325, 9999, 9801
