II. Teeth

1. Teeth and its types

The teeth are the hardest parts in our body. They are helpful for cutting and chewing the food. The teeth are found inside our mouth.

We develop two sets of teeth in our lifetime.

1. Milk teeth: The first set of teeth starts to develop from the age of six months. They are called milk teeth and they are 20 in number. At the age of 6 or 7 the second set of teeth grow after milk teeth fall.

2. Permanent Teeth: Second set of teeth are called permanent teeth. There are four types of teeth: incisors, canines, premolars and molars. If permanent teeth fall, we cannot grow one more set of teeth. So, it is important to take care of our teeth. There are 32 permanent teeth.

2. Importance of Oral Health

As we learnt, it is important to take care of our teeth and also our mouth. If you do not care your mouth and teeth, you will have problems with eating and speaking.

3. Healthy Mouth

It is important to take care of our teeth and mouth. Brushing teeth, eating healthy food and regular dental checkup keep us healthy. We should brush our teeth twice a day.

4. Foods for Healthy Mouth and Teeth

- Take plenty of fruits, vegetables and dairy products.
- Drink water or milk instead of sugary juices.
- Eat candy, cake and ice cream as less as possible.
