II. Properties of Materials

We can measure, see or feel the materials. Different types of materials have different properties that make them useful for various purposes. Most materials have more than one property. They can be hard or soft, shiny or dull, smooth or rough and flexible or rigid.

1. Hard and Soft Materials

Materials which cannot be easily compressed, cut, bent or scratched are called **hard materials**.
Example: Brick, bone and steel.

Materials which can be easily compressed, cut, bent or scratched are called **soft materials**.
Example: Foam, clay and skin.

Try to Answer

Write whether the given materials are hard or soft.

Wood	Eraser	Cotton
