In our daily life our effort is saved with the help of some simple machines.

We draw water from the well with the help of a wheel and a rope.

Simple machines are tools which are used to make our work easier. Some examples for simple machines are pulley, wedge, inclined plane, screw, lever, wheel and axle.

1. Pulley

Observe the picture. Which is easier? Lifting the load with the help of a pulley or without a pulley?

A pulley is a machine made up of a wheel with a cut around it. A rope or chain passes around the pulley. It rotates in the direction with more force. Eg: Crane

2. Inclined Plane

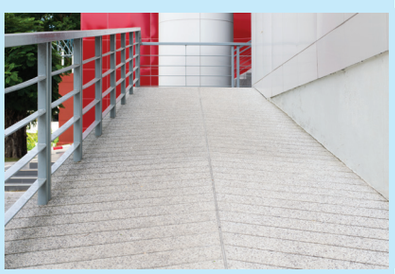

Observe the picture and discuss. Is lifting a box is easier than rolling it on a ramp?

An inclined plane is a flat sloping surface with one end higher than another.

Eg: Ramp, slide and slope for wheel chair.
