2 Biscuit

Biscuit is a small, flour - based baked food. It is generally made of wheat flour or oats sweetened with sugar.

The main ingredients of biscuit are flour, sugar, butter, water, milk, baking powder and flavours.

Biscuits are salty or sweet. Some biscuits have cream in between.

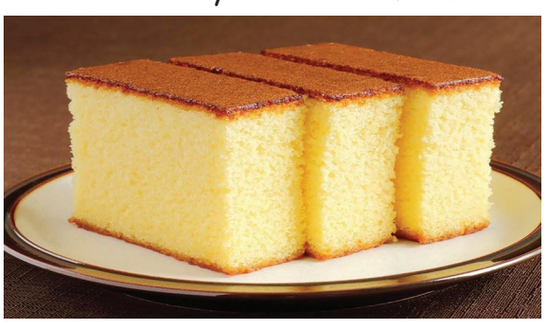

Do you know?

Biscuits are made with baking powder to make it airy.

3 Cake

Cake is a baked dessert. It is like a sweet bread. There are many varieties of cake with specific ingredients.

We use cake during celebrations. The common ingredients of cake are flour, sugar, eggs, oil, baking powder and flavouring agent.
