IV. Types of Lever

To understand the lever, we must know the following terms.

Load is the object on which the force is applied.

Effort is the force we apply on the lever.

Fulcrum is the point on which the lever rotates.

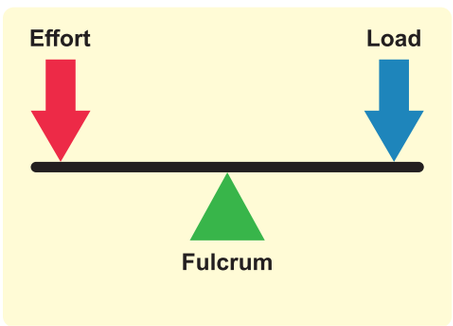

Lever is classified into three types according to where the load and effort are located with respect to fulcrum.

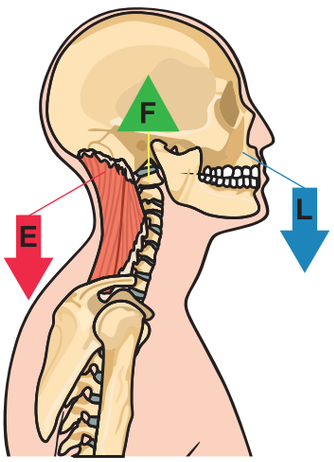

The three types of lever

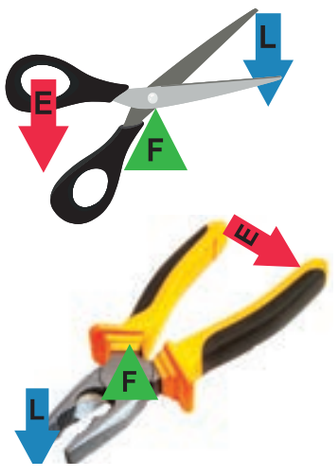

Class I lever
Class II lever
Class III lever

1. Class I Lever

When the fulcrum is between the effort and the load, it is known as Class I lever.
Eg: scissors, pliers, seesaw.

2. Class II Lever

When the load is between the effort and the fulcrum, it is known as Class II lever.
Eg: wheel barrow, lemon squeezer, nut cracker.
