Stainless steel water bottle and snack box are some examples of eco-friendly materials. Stainless steel does not leak chemicals into your food or water. So it is safer than plastic. These can be reused for a longer period of time.

ACTIVITY

Write any five non-recyclable items that you use or have seen in shop.

_____

Litter Free Environment

Litter in our environment is unsightly and spoils our experience of nature. It is also dangerous to animals that ingest it. Cleaning up loose waste is one of the best ways to keep our community and the environment green. By removing litter from environment, we are ensuring that it does not end up in our oceans.

National Green Corps (NGC)

It is a national programme initiated by the Government of India. The motto of NGC is

"Where there is Green, there is Prosperity"

It involves NGC school students in protecting and promoting the conservation of natural resources. They participate in activities like biodiversity conservation and waste management.

Make sure you put litter in a bag or in a dustbin.

When others pass you as you pick up litter, smile and say hello. It shows pride in community and encourages others to do their part
