Activity

Write the percentage of the gases present in air.

Nitrogen

The amount of Nitrogen present in air is about 78%.

It is used to fill up food packages to extend their shelf life.

Liquid nitrogen is used to store living cells.

Plants need nitrogen for their growth. We can see root nodules containing nitrogen in some plants.

Nowadays people use nitrogen gas to fill the tyres of their vehicles. Some compounds of nitrogen are used as explosives also.

In 1772, the Scottish chemist, Daniel Rutherford, reported "noxious air," which now we call "Nitrogen".

Activity

You might have seen some huge colourful balloons flying high in malls. Those balloons are filled with nitrogen gas. Write the reason for filling nitrogen gas in balloons.
