

LET US LEARN

A Lesson to save

TY7IQZ

On the way to the playground, in the fields, Amir saw dirt thrown out of a pit on the ground. He went near it and saw a small rat-like creature. He called out, "Hey! Who are you? What are you doing in there?"

The creature came out and took a glance at the boy and said "I am a mole. I am **digging** a burrow to catch the earthworms and save them for the winter."

"Interesting, how do you catch and save them?"

The mole replied, "I dig 'worm **traps**' along the tunnels, when the earthworms cross it they fall into it. I will bite and **paralyze** them and store in the tunnel to eat later."

The boy asked, "How many earthworms will you store?"

The mole replied, "As many worms as I can get. I don't eat all of them. I save them for using later. Now, I don't have any time to waste. I must build a lot of worm traps. See you later." The mole went inside the burrow.

Just then, near the mole's burrow, Amir saw a leaf moving. He went near it and saw a small ant. The ant was carrying a big leaf.

The ant yelled, "Get out of my way. It will take too long to go around your feet."

He asked the ant "Hey! Why are you carrying this big leaf? Isn't it easy to eat it and then go home?"

The ant dropped the leaf and replied, "I am a 'leafcutter ant'. I am collecting leaves for my colony. I can carry leaves that weigh nearly twenty times my weight." Amir was surprised. He asked, "Do you eat leaves?"
