LET US LEARN

The Struggling Star

Farhan and his father are reading the newspaper, the favourite part of his morning. He gets up, brushes his teeth, drinks his milk and sits with his father to read the news every day.

Farhan: Abbu, what is this y-o-u-n-g leaders award?

Father: It is young leaders award. It is given to only 17 people from around the world every year. It recognises the effort they have taken to make the world a better place.

Farhan: Wow! Only 17? I am so proud that an Indian has got this award.

Father: Do you know why he got it?

Farhan: No, can you please tell me?

Father: I am happy that you asked. It is very important to not only be proud when we see or hear such news. We should also…

Farhan: Learn from it! Yes, Abbu I remember this.

Father: Very good! Kartik is a technologist who has not let his disability stop him from learning. Not only that, he has empowered other people with disabilities to be successful IT engineers.

Farhan: What disability?
