Exercise 1.5

1. Find the perimeter of the following figures.

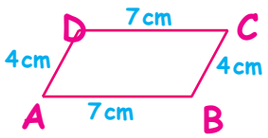

i.

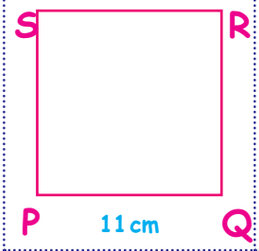

ii.

iii.

iv.

v.

2. Solve the following.

i. A side of a square-shaped tile in a park measures 30 cm. Find the perimeter of the tile.

ii. Find the perimeter of a rectangle whose adjacent asides are 12 cm and 8 cm.

iii. Find the perimeter of the rhombus whose sides are 13 cm each.

iv. The adjacent sides of a parallelogram are 6 cm and 7 cm. What is the perimeter of that parallelogram?

v. The sides of a trapezium measures 8 cm, 7 cm, 4 cm and 5 cm respectively. What is the perimeter of the trapezium?

1.2 Creating different 2D shapes

1.2.1 Uses of tangram in combining different 2D shapes.

Tangram is a thousand years old Chinese puzzle consisting of five or seven geometrical pieces called **tans** put together to form different pictures.

Playing with tangrams develop skills such as problem-solving, logical thinking, perceptual reasoning, visual spatial awareness and creativity.
