1.3 Properties of 3D objects

Cube

- A cube has 6 faces.
- It has 12 edges.
- It has 8 vertices.
- All the six faces are equal.

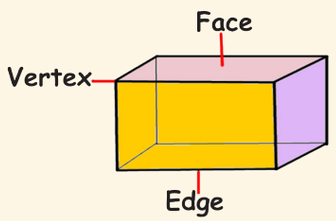

Examples

Dice, ice cubes, building blocks, rubik's cube.

Cuboid

- A cuboid has 6 faces.
- It has 12 edges.
- It has 8 vertices.
- Its opposite faces are equal.

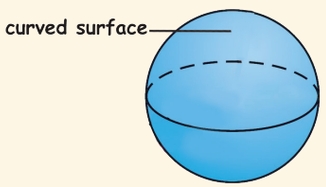

Examples

Match box, bricks, eraser, book, toothpaste box.

Sphere

- A sphere has only one curved surface.
- It has no vertices and edges.

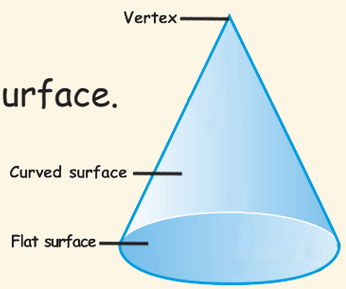

Examples

ball, globe, laddu.

Cone

- A cone has one flat surface and one curved surface.
- It has one vertex.

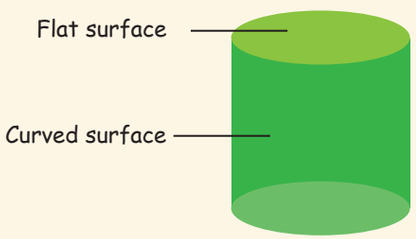

Examples

Cone ice cream, party cap

Cylinder

- A cylinder has 2 flat surface and 1 curved surface.
- It has no edges and vertices.

Examples

straw, gas cylinder, pipe.
