3. Wedge

A wedge is a tool with a sharp edge which can be used to split materials. It is used to break wooden logs into two pieces.
Eg: Knife, scissors and axe.

4. Screw

The screw is used to raise weights and to hold objects together.
Eg: Pencil sharpener, screw-jack, bottle cap and windmill.

The screw in the bottle cap holds the cap and the bottle together.
The blade and sharpener are held together by screw.

5. Wheel and Axle

Wheel and axle consist of a wheel attached to a small rod so that these two parts rotate together.
Eg: Bicycle wheel, door knob, grinder, axle wheel.

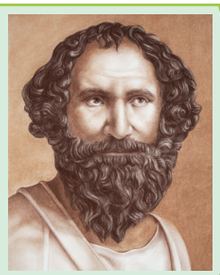

More to Know

Simple machines usually exchange a smaller force to move a heavy object. The work required is the same, but the force required is less. The idea of a simple machine originated with the Greek philosopher Archimedes around the 3rd century BC.
